LIMMER ASPHALTE.—BUILDERS, CONTRACTORS, &c., are invited to a NEW ASPHALTE from a mine in Hanover, which, on analysis, is found superior in quality to that from Seyssel, or to any other Asphalte yet known in Europe; and from the locality of the mine, can be shipped from Bremen on lower terms than any other genuine Asphalte. Specimens can be seen at the counting house of L. C. VAN SINDEN, 44, Mark-lane, where full particulars will be furnished to persons desirous of purchasing the raw material direct from the mine, at a stated price, free on board at Bremen. The footways, &c., of the city of Hanover are now laid down with this Asphalte, which are beautiful in appearance, unaffected by the strong heat of summer, or the severe cold of winter, and guaranteed for ten years.

EXHIBITION PRIZE MEDAL!— RANSOME and PARSONS beg to draw the attention of Architects, Builders, and Others, to their PATENT STONE, which, in its composition, differs essentially from all other artificial productions for a similar purpose—Flint forming the basis in character, texture, and appearance. It is made to resemble every kind of natural stone, at pleasure, from the finest marble to the coarsest sandstone, and to possess all their valuable and enduring properties, without being liable to any of their defects. It is especially applicable to all kinds of architectural decorations and mouldings, fountains, balustrades for terrace walks, vases, and pedestals, &c. &c.; also for all varieties of plain and ornamental flooring. In price it is far below the cost of any natural product, and, in many cases, can be furnished as low as ordinary cement. Copies of Busts, Statuary, or other Works of Art, can be produced in the finest Patent Stone as faithfully as in Plaster of Paris.

IMPORTANT TO WATER COMPANIES, MANUFACTURERS, AND THE PUBLIC.

Ransome and Parsons beg to call the attention of Water Companies, Manufacturers, and others to their

PATENT STONE FILTERING SLABS,

which are capable of filtering from 100 to 200 gallons of water per superficial foot per day, with a head of water varying from 2 to 4 feet. These slabs can be produced to any required dimensions, and, consequently can be adapted to any cistern, tank, or reservoir. By a simple precautionary arrangement, they are prevented from being in any way choked or impeded in their action. Price 1s. per superficial foot.—Full descriptions and prices of their other descriptions of Filters will be supplied on application.

IMPORTANT TO BRICKMAKERS AND CONTRACTORS.

Ransome and Parsons are also the Proprietors of HALL'S PATENT BRICKMAKING MACHINE, capable of moulding 15,000 Bricks per day and upwards, which are superior to those manufactured by hand, and are produced at considerably less cost.—Communications to be addressed to the Patentees, Messrs. RANSOME and PARSONS, Flint-wharf, Ipswich.

BRICK BEAM at the EXHIBITION BUILDING, Erected by J. B. WHITE and SONS, MILLBANK-STREET.—For diagrams and description of this beam, constructed of Portland Cement and Railway Bricks, broken down with a weight of 41,000 lbs. Shed Exhibition, 1851, in presence of the Jury of Class 27—See The Builder, Sept. 27, No. 451; and Times and Chronicle, Sept. 29, "Exhibition Results."

JOHN BAZLEY WHITE and SONS, MILLBANK-STREET, Westminster,

Manufacturers PORTLAND CEMENT of the best quality.

ATKINSON'S CEMENT, made from Whitby Rock, exclusively from the Malgrave Estate; and ROMAN CEMENT, made of Sheppy and Harwich stone.

These cements are all used for external purposes, either for Brickwork or as Stucco.

For internal uses they Manufacture and Sell:—

KEENE'S CEMENT;
PARIAN CEMENT;
FRENCH PLASTER;

The qualities of which are well known as quick-drying and hard stucco, that can be painted upon within a few days.

Warehouses in London:—

Millbank-street, Westminster;
South Wharf Road, Paddington;
Earl-street, Blackfriars; and at
Sea-street, Liverpool.

PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER CORRUPTIBLE INGREDIENT.

As used at St. George's Hospital, Hyde Park Corner.

JOHNS and CO. having effected some important improvements in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing every advantage over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be varied to any other.—DOES NOT WASH OFF—is perfectly dry in twenty-four hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One coat will cover 200 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its extraordinary for internal as well as external surfaces, places it above all other materials of its kind; it has no caustic qualities; may be painted or papered in a few days; never blisters, cracks, or vegetates; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials, prospectuses, and every information may be obtained, on application to the Sole Agents, PHILIP MARE, and CO. at the Warehouse, 22, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

MEDINA (ROMAN) CEMENT.—The material of which this cement is made is obtained in the Isle of Wight. It has all the properties of the Sheppy Stone, but is much better adapted to engineering works, from the rapidity with which it sets and hardens under water. It has been long used at the great Breakwater at Cherbourg; in a similar work at Alderney; and at Dover new pier, to unite the masonry. The foundation of the centre pier of the Tubular Bridge at Menai Straits is laid in Medina Cement. A new groyne at Sandown Bay, Isle of Wight, has been constructed of no other material but this cement and small shingle. The work extends 300 feet into the sea, and is exposed to the most violent pulse of the Channel, in a position where every former construction had been repeatedly washed away. The inconvenience of the varied qualities of Roman Cement are superseded by the use of this improved manufacture.

CHAS. FRANCIS and SONS, Nine Elms, London; or West Medina Mill, Newport, Isle of Wight.

Agent for Southampton, R. L. PLUDER, American Wharf.

PARIAN CEMENT for internal use, to be PAINTED IN A FEW HOURS, AND PAPERED WITHIN A COUPLE OF DAYS.—CHARLES FRANCIS and SONS, Patentees, Nine Elms, London.

PORTLAND CEMENT, in Casks of Four Imperial Bushels QUANTITY NOT WEIGHT, BEING THE STANDARD.—CHAS. FRANCIS and SONS, Cement Works, Nine Elms, London.

6, South Wharf, Paddington.

PORTLAND CEMENT.—CHARLES RICHARDSON has the greatest confidence in introducing to the trade the above superior CEMENT, being of uniform colour and quality, a desideratum never before attained in Portland Cements. It possesses extraordinary cementitious qualities, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combined with which its eminent hydraulic properties stamp it as ever as the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by R. GILLAVEN, Esq., at his Works, near the River Avon, and sent to all parts of the Kingdom per boat or rail, at a reduced price to the trade.

PORTLAND CEMENT.— JAMES WESTON, having commenced manufacturing the above Cement, begs to inform the trade in general that he can supply them with any quantity they may require, either at his Works—Mill-wall, Poplar; St. Andrew's Wharf, Earl-street, Blackfriars; or Middle Scotland-yard, Westminster. Manufacturer of Roman Lime, and Mastic Cements, French and English Plaster, &c.

PATENT PORTLAND AND ROMAN CEMENTS.—WINKFIELD, BELL, and CO., of East Greenwich, Kent, having now completed some handy contracts, are prepared to execute orders to any extent for either of the above Cements, which they are quite prepared to prove exceed any others in their cementitious qualities at present manufactured. Many highly respectable references can be given where their Cements have been successfully used. Orders addressed to their Works will be punctually attended to, and terms cash. Where quantities are used a corresponding price will be made.—Agent at Southampton, Mr. GEORGE SHARPE, Union Wharf.

GEORGE and THOMAS EARLE, CEMENT MANUFACTURERS, HULL.
